FORGE Gaming headset

■ Preface

Listening to all directions, you can "play" the battlefield!-----

TAKSTAR is the well known leading brand in China electro-acoustic industry. Liberty Gamer is the professional gaming headset developed by Takstar based on many years of technology accumulation. It features high performance and comfortable wearing and emphasizes on providing competition advantages and brilliant gaming experience. Life is full of rules just like gaming. Enjoy the gaming freely and enjoy your life. Gamers obey the rules but are not limited by the rules. Try your best to enjoy the gaming and you are the liberty gamer. Gaming well and living well, you need a good headset.

Please read the user manual carefully before operation and keep it for reference in future. If you have any question or suggestion, please contact our local dealer.

Features

- 7.1virtual sound, wide sound field, ambient gaming experience
- Ø40mm NdFeB driver unit, high sensitivity, wide frequency response and dynamic
- Rotating high sensitivity microphone; Rotate it to turn off automatically for wonderful talking experience
- HiFi sound to promote identify the opponent position and fight back
- 16.80 million RGB effect to set the light atmosphere
- Ergonomic design to suit for various wearing on various heads
- Comfortable headband and ear pads for long time wearing

FORGE Gaming headset

■ Product Content

Gaming headset... User manual....

Application

PC/MAC with USB interface

■ System Requirement

windows7 or more advanced version, OS X 10.9 or more advanced version

■ Features

Unit: dynamic Unit diameter: Ø40mm

Unit Impedance: 32Ω±15%

Headset Frequency Response: 20Hz-20kHz Headset Sensitivity: 95.5±3dB at 1kHz Microphone Sensitivity: -36.5±4dB@1kHz

Rated Power: 10mW Max Power: 30mW

Net Weight: approximate 322g

Note: The specification is tested by Takstar lab and Takstar reserves the final

explanation right.

4.Set the default equipment

Windows:

"Control panel" / "hardware and sound" / "sound" , select "Liberty Gamer FORGE" In "playback" and "recording"

"system preference setting" / "sound" , select "Liberty Gamer FORGE" in "output"

13

FORGE Gaming headset

5. Microphone mute control

Rotate microphone upward to "A" for mute status. Rotate microphone downward to "B" for mute status.

FORGE Gaming headset

■ Correct Operation

For safe and comfortable operation, please read carefully and abide by the following

1.To avoid hearing loss, set the volume of the player to minimum before connecting the headset. After putting the earphone on, increase the volume to a proper level. Noise is measured in decibels (dB). Any outside noise of 85 decibels or more will cause gradual hearing loss.

2.Please pay attention to your operation habits! Volume and time are directly and inversely proportional to hearing loss. The louder the volume, the shorter the time you listen; the more comfortable the volume is, the longer the time you listen. Listen high volume sound will cause damage to your hearing.

This dB table lists the comparison of some normal sounds and the potential hurt level to your hearing:

Sound Source	Noise Level	Consequence on Hearing	
whisper	30dB	very quiet	
quiet office	50-60dB	0-60dB comfortable hearing level is below 60dB	
vacuum cleaner/ hair drier	70dB	It has some invasion and interference to the telephone talking	
food processor	85-90dB	85dB (continuously 8 hours) is the level to hurt the hearing	
garbage cleaning machine or cement mixer	100dB	It is recommended to hear the sound of 90-100dB for less than 15 minutes	
electric motor saw/ electric drill	110dB	Hearing the sound over 100dB without any protective measure leads to permanent hearing loss	
rock & roll concert (it depends)	110-140dB	The painful hearing threshold is about 120dB	

The average person can hear the music safely at 70% volume for 4.6 hours every day. It is very important to know the volume and time when hearing music. Use your equipment sufficiently at safe volume level to enjoy the outstanding sound performance.
